

GR 16 Sallent de Gállego

ETAPA Sallent de Gállego > Biescas

MIDE GR 16 ETAPA SALLENT DE GÁLLEGO-PANTICOSA-HOZ DE JACA-BIESCAS	
○ Horario / Time	7 h 25 min
▲ Desnivel (+) / Accumulated altitude	680 m
▲ Desnivel (-) / Accumulated altitude	1.090 m
— Distancia / Distance	24,5 km
C: Tipo de recorrido / Type of path	travesía

* Condiciones de verano, tiempos estimados según criterio MIDE, sin paradas.

MIDE es un sistema de comunicación entre excursionistas para valorar y expresar las exigencias técnicas y físicas de los recorridos. Su objetivo es unificar las avaluaciones sobre la dificultad de los itinerarios y permitir a cada practicante una mejor elección. Valoración de 1 a 5 puntos, de menos a más.

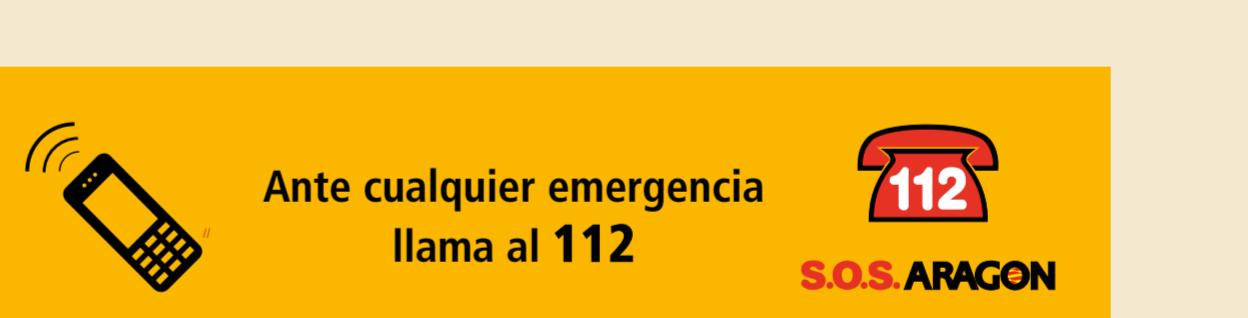

MIDE is a system of communication between hikers to value and physical demands of the journeys. Its objective is to unify the evaluations about the difficulty of the routes and allow each hiker to make a better choice. Evaluation of 1 to 5 points, from fewer to more.

El GR 16 es un sendero de 4 etapas y una variante que atraviesa de norte a sur la comarca oscense del Alto Gállego, sirviendo de eje de comunicación entre el Pirineo y el Prepirineo. A su vez, conecta con tres grandes GR transversales de la provincia de Huesca: el GR 11 "Senda Pirenaica", en Sallent de Gállego; el GR 15 "Senda Prepirenaica", en Biescas; y el GR 1 "Sendero Histórico", en Nocito, ya en la comarca de la Hoya de Huesca.

Como gran eje vertebrador, el GR 16 tiene gran interés etnológico y patrimonial, ya que recorre tierras como el valle de Tena, la Tierra de Biescas o el Serrablo, histórico territorio jalónado por singulares iglesias del románico serrabés y pueblos de gran belleza, algunos de ellos deshabitados. Todas estas cualidades, unidas al bien conservado y diverso paisaje que atraviesa, hacen de este gran recorrido un sendero de especial interés histórico, arquitectónico y naturalístico.

The GR 16 is a four-stage path and a variant that crosses the Alto Gállego district of Huesca from north to south, serving as a communication axis between the Pyrenees and the Pre-Pyrenees. At the same time, it connects with three major GR routes of the province of Huesca: the GR 11 "Senda Pirenaica", in Sallent de Gállego; the GR 15 "Senda Prepirenaica", in Biescas; and the GR 1 "Sendero Histórico", in Nocito, in the Hoya de Huesca district.

As a major backbone, the GR 16 is of great ethnological and heritage interest, as it crosses lands such as the Tena valley, the Tierra de Biescas or the Serrablo, a historic territory marked by Serrablo's singular Romanesque churches and villages of great beauty, some of them uninhabited. All these qualities, together with the well-preserved and diverse landscape it crosses, make this long route a path of special historical, architectural and naturalistic interest.

► ETAPA Sallent de Gállego-Biescas

Esta primera etapa del GR 16 inicia su recorrido al sur de Sallent de Gállego, junto al sendero GR 11 "Senda Pirenaica". Los primeros pasos del recorrido por el valle de Tena llevan a enlazar con el "Camino Natural del Embalse de Lanuza". Junto a él, flanqueando la orilla derecha del embalse, bajo abedules, hayas, quejigos, sauces y praderas ganaderas, el GR llega a la presa de Lanuza, con buenas vistas sobre el valle. Allí, dejando el Camino Natural, el GR 16 cruza la presa en dirección a Lanuza y, por medio de un atajo, enlaza con la pista de tierra que lleva a Panticosa. Por ella, sin apenas desnivel, atraviesa el encajado paso del Cuello Manzanico y, tras surcar distintas partidas agrícolas, desciende hasta Panticosa.

Tras atravesar las calles de la villa punita, el GR 16 baja a cruzar el puente medieval sobre el río Calderón, tomando el viejo camino La Calderón. Desde el aparcamiento de la estación de esquí, el GR 16 cruza el puente sobre el río Bolática y, tras un breve tramo de pista, toma el camino viejo, orientado al sur, que asciende por el barranco Tenetero. Una vez en la cima, el GR 16 cruza el puente sobre el río Sabócol y, tras atravesar el bosque de Politura, se dirige a la ermita de Santa Elena. Junto a la ermita, el GR 16 cruza el río Bubal y, tras atravesar el pueblo de Biescas, finaliza su primera etapa del GR 16.

The first steps of the GR 16 route lead to joining the "Camino Natural del Embalse de Lanuza". Next to it, flanking the reservoir's right bank, it reaches the Lanuza dam, with good views over the valley. There, leaving the Natural Road, the GR 16 crosses the dam and joins the dirt track that leads to Panticosa. With hardly any slope, it crosses the incised pass of the Cuello Manzanico and, after traversing different agricultural areas, it descends to Panticosa.

From the centre of Panticosa, the GR 16 goes down to cross the medieval bridge over the Calderón river and reaches the car park of the ski resort. There, the long route crosses the bridge over the Bolática river and takes the road to Hoz de Jaca, then ascends the steep slope to Collada Puyalons. After crossing the dense Frazacoz forest and crossing the Tenetero ravine, the GR 16 ends up joining the asphalted track leading to the Sabocoz tam. This track descends until reaching the town centre of Hoz de Jaca.

From Hoz de Jaca to Santa Elena, the GR 16 shares the route with the PR-HU 78 path. Together they open the way from south to north through the bottom of the impressive gorge created by the Gállego river between the Tendeñera and Telera/Tendenera mountain ranges. The long route descends through dense forests to the base of the Bubal dam, now in the vicinity of the uninhabited Politura. Continuing through a magnificent beech forest and parallel to the Gállego river, the path ends at its arrival at Santa Elena, an attractive area marked with different elements of interest. Without going up to the Santa Elena Shrine, the GR 16 passes next to the Santa Elena dolmen and a path accessible for disabled persons runs through the forest. The path, crossing a flat plain, reaches the town of Biescas, the final point of this first stage of the GR 16.
